Hiring Manager
Seitel Systems
Seattle, WA

Dear Hiring Manager,

I am writing to apply for the Service Desk Technician position at Seitel Systems. I am a Computer Science graduate from Bellevue College based in the Puget Sound area, and I am excited about the opportunity to contribute to an IT engineering team known for strong client service, technical quality, and long-term employee growth.

At Pacific Northwest National Laboratory, I supported a distributed, networked system where reliability and clear troubleshooting were essential. I implemented and maintained service components, diagnosed issues across interconnected systems, and worked in Linux environments to resolve runtime failures and improve stability. I also developed device discovery workflows to increase operational visibility and documented recurring issues and resolution steps to improve consistency across the team.

I bring a support mindset that combines technical depth with communication. As a teaching assistant, I helped students with debugging and explained technical concepts in clear, practical terms. That experience strengthened my ability to listen carefully, adapt explanations to different audiences, and manage multiple requests while maintaining quality service.

I am especially interested in Seitel because of your client-first engineering approach and your emphasis on sustainable work practices. I value environments where professionalism, accountability, and teamwork are expected, and where engineers are trusted to do thoughtful, high-quality work without burnout.

I would welcome the opportunity to contribute to your Seattle-based team and support clients across the region through dependable technical service and continuous improvement. Thank you for your time and consideration.

Sincerely,
Igor Janotti
