SUMMARY

IT-focused software engineer with hands-on experience troubleshooting distributed systems, supporting reliable operations, and communicating technical issues clearly to mixed audiences. Strong foundation in desktop and server-adjacent environments, cloud-hosted services, and structured problem solving. Motivated by client service, high-quality support, and long-term growth in IT engineering.

TECHNICAL SKILLS

Support & Operations: Advanced troubleshooting, incident triage, root-cause analysis, documentation, user-focused communication

Systems: Windows and Linux environments, networked services, Active Directory/Entra familiarity, Office365 familiarity

Cloud & Platform: AWS (Lambda, DynamoDB, S3, SNS), hosted solutions concepts, backup and reliability workflows

Security & Reliability: Service stability practices, defensive configuration mindset, observability, diagnostics

Tools: Git, Python, shell scripting basics, C/C++, C#, Java

EXPERIENCE

Pacific Northwest National Laboratory

Jun 2025 – May 2026

Software Engineer Intern

Bellevue, WA

- Supported a distributed, agent-based infrastructure platform by diagnosing and resolving cross-service technical issues
- Developed device discovery and scanning workflows to improve visibility and operational support for networked systems
- Troubleshoot runtime problems in Linux environments and worked with teammates to restore reliable system behavior quickly
- Documented recurring issues, resolution steps, and system behavior to improve team response quality and consistency
- Communicated technical findings to peers and stakeholders in clear, actionable language

Bellevue College

Feb 2024 – Mar 2024

Teaching Assistant – Programming Languages (C++)

Bellevue, WA

- Guided students through debugging workflows and explained technical concepts to non-experts with patience and clarity
- Managed support time across many requests while maintaining quality and responsiveness

PROJECTS

AI-Powered CLI Tooling | *Python*

- Built deterministic command tooling with validation and safe execution paths to reduce operational errors
- Designed for predictable behavior, quick troubleshooting, and clear failure messages

Cloud-Based Event-Driven Processing Pipeline | *C#, AWS*

- Implemented asynchronous workflows across cloud services with focus on reliability, recovery behavior, and monitoring

Personal Portfolio Website | *JavaScript, HTML, CSS*

- Built and maintained a responsive web project, handling environment setup, issue fixes, and iterative improvements

EDUCATION

Bellevue College

Bellevue, WA

Bachelor of Science in Computer Science

August 2025

- GPA: 3.54
